Abstract (en)
[origin: EP0002921A1] A golf ball teeing apparatus (10) comprising a frame (11), a tee (16) fixed stationary with respect to the frame (11), a magazine (14) elevated with respect to said tee (16) and adapted to receive a supply of balls (15), a carrier to receive a ball (15A) from said magazine (14) and deposit said ball (15A) on said tee (16), said carrier including a horizontally pivoted arm (13) with a receptacle (17) adjacent one end to retain a ball (15A) during movement of the carrier between said magazine (14) and said tee (16), said arm (13) being balanced so that a ball (15A) deposited in said receptacle (17) causes said arm (13) to pivot under the weight of said ball (15A), and control means to regulate the delivery of balls from said magazine to said receptacle.
