Abstract (en)

[origin: FR2762783A1] The present invention concerns a use of at least one oligosaccharide possessing from 2 to 6 glycoside residues and having a galactose residue in a non-reducing terminal position, or of a derivative of such an oligosaccharide capable of being obtained by attachment of a hydrophobic radical, for the preparation of a composition intended for increasing the synthesis and/or decreasing the degradation of the proteoglycans of connective tissue.
