Abstract (en)

To establish a newspaper distribution system which incorporates no consumable at the time of distributing newspapers thereby to eliminate the fear of break of a naked stack of newspapers or the collapse of a packaged stack. A newspaper distribution system 10 comprises an assembly type box 13 capable of being assembled/developed a plurality of times; an automatic assembler 12 for assembling a box 13 in a developed state; a newspaper loader 17 for loading the assembled box 13 with a desired number of newspapers 18; an information display 25 arranged on the surface of the box 13 and capable of erasing/printing information a plurality of times; an address printer 24 for printing the surface of the information display 25 with information necessary for transferring the box 13; and means for sorting and transporting the box 13 to a necessary truck gate. <IMAGE>
