Abstract (en)

[origin: FR2767555A1] The skylight vent comprises a housing (1) with apertures in its inner and outer surfaces formed by offset plates (2, 3). It can also have an inner vane (12) which overlaps the plates' edges and further reduces the possibility for inserting a tool to operate the skylight's inner control bar (8), while a hood (9) on the ventilator housing prevents any external access to its lock.
