Abstract (en)
[origin: EP0004144A1] A swimming pool with a pair of end members each of which has a pair of flanges defining a channel, substantially the shape of the cross-section of the sides and bottom of the pool, and a flexible sheet material the lateral edge portions of which engage and are sealed in the channel to form the sides and bottom of the pool; in which each of the end members (12, 13) is of sheet material, the side and bottom edge portions of each end member are engaged in a longitudinal groove (17) of a flexible junction strip (16), securing means (19) advantageously in the form of a wedging strip, are provided to secure and seal the side and bottom edge portions of each end member (12, 13) in the groove, and the flanges (18) are formed integrally with the junction strip (16) and extend substantially perpendicular to the groove (17).
