Abstract (en)
[origin: EP0004437A1] The present invention relates to a motor vehicle fault indicating system and provides such a system including a display device (18) having a face marked with a legend and illuminated by a lamp. The lamp is normally controlled by a transducer (CL) which detects the level of fluid in the engine coolant reservoir, but, in certain circumstances, is controlled by another transducer (WL) which detects the level of fluid in the screen washer reservoir.
