Abstract (en)
[origin: EP0004586A2] 1. A spring catch (14) with an antifalling brake (13) having a cable coupling member provided with a screwed cover plate (23) and a braking channel (22) disposed therebetween in which there may be clamped a cable (15) which frictionally slides through the said channel only when a predetermined falling force is exceeded, characterized in that the cable coupling member (21) is formed by the body (27) of the spring catch itself and the width of the braking channel (22) disposed within the spring catch body (17, 41) is chosen in such a way that the cable or the like (16) may be clamped between an abutment surface on the body (17, 41) of the spring catch and the cover plate (23, 46') or the cover plates (46) respectively, and that the body (17, 41) of the spring catch and the cover plate (23, 46') or the cover plates (46) respectively, form in the region of the braking channel (22) a handgrip (32) of the spring catch.
