Abstract (en)

[origin: EP0004616A1] 1. Box, particularly a fish box, made of plastic and consisting of a rectangular or square floor 1 with interconnected side walls 2 which stand erect thereon, and possessing carrying attachments 6, 7, which, even in the case of boxes situated close together, enable carrying bars 12, belonging to a lifting apparatus and fitted with pivotable grippers 13, to be lowered, and enable the said grippers 13 to engage, characterized by the fact that the corners x of the box are of a shape which is flattened in such a way that when four identical boxes are placed together in one common plane, with their respective side walls facing towards one another, an opening 9 (Fig. 3) extending over the entire height of the boxes is formed in their common corner, and that the carrying attachments 6, 7, consist of a carrying attachment 6, 7, provided in each corner of the box in such a way that a lifting apparatus, fitted with four carrying bars 12, which are allocated to the respective corners 8 of the box and which can be lowered into the openings 9, can be caused to engage (13) behind the carrying attachments 6, 7 (Fig. 4).
