Abstract (en)
A plant for storing liquids at low temperature, with one or more heat insulated, single or double-walled storage tanks under ground. In order to make the plant safe against explosions and fire while maintaining installation and maintenance costs low, the tank(s) is located in a shaft (10) under a dome like concrete barrier (16) designed to resist an external shock wave pressure and provided with maintenance passages (17) which are protected against shock waves and flame penetration.
