Abstract (en)  
[origin: EP0005802A1] 1. Furniture with several cushions of identical width which may at will be used in line as a couch or foldable as a cushioned seat, the overall length of said cushions being equal to the length of the couch, the bottom cushion part thereof (1) is linked by a hinge (4) to the super imposed seat cushion part (2) of identical surface dimensions, a back-rest cushion part (3) is placed on top of the seat cushion, the bearing surface of which differs in height from the upper surface of the seat cushion part (2) by the seat depth of the seat, in which construction the hinge (4) is fastened to the posterior upper edge of the bottom cushion part (1), this part is arranged in a loose or in a fixed position on a lower bearing frame (5) provided with casters (6) linked to a back-rest part consisting of an internal and an external connection frame (7, 8) ; here the internal connection frame (7) is connected hingewise at its lower edge (seen in vertical position) with the lower bearing frame (5) ; it is provided with supporting feet (9) for support in the couch position ; the exterior supporting frame (8) is connected hingewise at its upper side (viewed in vertical position) to the internal supporting frame (7) ; with the following special features : the internal bearing (supporting) frame (7) is connected hingewise to the posterior lower edge of the lower supporting frame (5), and the exterior supporting frame (8) connected in the same way to a wall part (17).
