Abstract (en)

1. A means of connection for connecting bricks, especially apertured bricks having pores formed therein, at the supporting and/or abutting joints thereof, said connecting means being formed by a carrier material in the form of a strip-shaped fabric or fiber fleece impregnated with a bonding agent, characterized in that the bonding agent is a duroplastic resin cold-hardening owing to a corresponding dosing of the hardening agent and, if desired or required, the accelerator, and having the hardening agent and the accelerator microencapsulatedly incorporated therein by admixture.

Abstract (de)

Verbindungsmittel für Mauersteine (10) in Form eines aufrollbaren oder klappbaren Bandes (12) oder Streifens, das aus einem härtbaren Bindemittel und einem die Bandform sichernden Zuschlagstoff besteht. Der Zuschlagstoff kann z.B. ein faserhaltiges Material sein.
