Abstract (en)

Van with illuminated publicity side panels, which are characterized by the fact they have integrated or not integrated illuminations (3) on the periphery for newly designed vehicles and attached by means of screws on the side parts for vehicles already in use. The illuminations (3) are illuminated with rays (4) that solely fall on the publicity area (1) and are supplied with energy by the electrical system of the van. The control for connecting and disconnecting the illuminations (3) is interconnected to the control (6) for connecting and disconnecting the front headlights of the van. <IMAGE>
