Abstract (en)

[origin: EP0006649A1] 1. A method of manufacturing a water-case of which the inner surface of the body is lined with a part consisting of synthetic material obtained by overmolding, characterized in that it comprises the steps of roughly machining the inner surface of the body without any other operation, cleaning the thus machined surface, coating the cleaned surface with a liquid organic substance adhering to the metal surface and to organic polymers used for overmolding, and lining the thus dressed surface by overmolding same with a synthetic material consisting of an organic polymer.
