Abstract (en)

An applicator of application substances, which can be repeatedly used and can be mounted on various containers, is provided. An applicator 10 comprising: an application surface 11 to be in contact with a target application surface and a support surface 13 to be in contact with a finger being formed as integrated front and back surfaces; a mounting port 14 matching an opening 21 of an application substance container 20 for housing an application substance; a discharge port 12 being opened in the application surface 11; and a flow path 15 guiding the application substance from the mounting port 14 to the discharge port 12, penetrating between the application surface 11 and the support surface 13.
