Abstract (en)

[origin: WO7900111A1] A process for making lipid-containing foodstuffs comprising solubilizing particulate proteinaceous matter, admixing a lipid material so as to form an emulsion, and contacting the emulsion with an effective amount of a pH adjusting agent to lower the pH to its isoelectric point, thereby aggregating the protein and simultaneously microencapsulating the lipid.

Abstract (fr)

Procede de fabrication de denrees alimentaires consistant a solubiliser des substances proteiques particulaires, a les melanger avec un lipide pour obtenir une emulsion, puis a mettre en contact l'emulsion avec une certaine quantite d'un agent permettant d'ajuster le pH a son point isoelectrique, agglomerant ainsi les proteines et provoquant simultanement la microencapsulation des lipides.
