Abstract (en)

[origin: EP0007006A1] 1. Bar grid (11) for forming door mats or foot scrapers, with which at least the longitudinal bar sections (12), kept at a predetermined distance from one another by transverse webs (13), have a U-shaped or H-shaped cross-section and with which inset strips (18) of deformable material, e.g. felt, rubber, bristle material or textile carpeting, are to be releasably fitted into the channels (17) which are open in the longitudinal direction on the upper side of the longitudinal bar sections (12), characterized in that longitudinally extending corrugations or teeth (16) are formed in the longitudinal bar sections (12) on that side of their profiled webs (16) which is opposite the channels (17) and the bar grid (11) can be turned through 180 degrees in its supporting plane.
