Abstract (en)
[origin: EP0007322A1] A board game device for playing a game entitled "ENVIRONMENT" and which includes a rectangular board (10) having a path of movement (12, 14) delineated thereon with the path including various alternate routes (28, 30) and being divided into a plurality of segments (18,20) with the segments having various indicia associated therewith. Cards with indicia thereon are placed on the board (10) and playing pieces are provided which are moved in accordance with a chance device in the form of a unique roulette wheel and simulated money is used in playing an interesting and educational game. This game device creates an interest in the environment in the players which is accomplished by having the players acquire awards for their active preparation in the game and the knowledge obtained in connection with environmental science.
