Abstract (en)

Disclosed is a food package wherein plate-shaped food is contained in a compact manner, and from which the plate-shaped food can be easily removed and readily consumed even if one hand is otherwise occupied, etc. Further disclosed is a method for producing the food package. The main package packages each plate-shaped food by means of a packaging sheet, which comprises a pull-out section, a fixed section, and a weak section therebetween, and which can be unsealed by severing said weak section and pulling out said pull-out section. A plurality of said packaged plate-shaped foods are fixed and connected by a connecting mounting sheet at said fixed section, forming a integrated plate-shaped food unit, and a plurality of said plate-shaped food units are housed and fastened in a container. The disclosed production method comprises stacking plate-shaped food units into bundles, which are fastened to the container.
