Abstract (en)

[origin: WO2012134276A1] The invention relates to a vessel (1) comprising a hull (2), a deck (3) and at least one superstructure (4) fixedly mounted to the deck (2) of the vessel (1). The vessel (1) comprises equipment (10) attached to the deck (3) of the vessel (1). The equipment (10) comprises at least one equipment part (11) that can be positioned in an onboard position and an outboard position, wherein the equipment part (11) at least partially protrudes from the hull (2) of the vessel (1). The vessel (1) comprises a frame (20) for supporting the at least one equipment part (11). The frame (20) is connected to the superstructure (4) via a hinge construction (30) allowing the at least one equipment part (11) to be moved from the onboard to the outboard position and vice versa while being supported by the frame (20).
