Abstract (en)

A method for determining a compatibility between a plurality of users in a shared vehicle (3), comprising the steps of i) determining at least one journey (4) to be undertaken by users (1); ii) assigning a profile to each user (1), where the profile is: driver (12), passenger (11) or neutral (13); iii) determining at least one compatibility between the at least one journey (4) by the users (1); and iv) determining at least one transfer compatible for its sharing between users (1), based on the at least one particular compatibility between the at least one journey (4) by the users (1), and the profile assigned to each user (1), in such a way as to facilitate the bringing together of users (1) with a view to sharing a transfer, via an application which they have on their mobile devices (2).
