Abstract (en)

A device for adjusting the position of an armrest of a chair, which comprises a clamp (11), stably associated with the chair (3), which interacts selectively with a vertical position selector (29), associated with a box-like body (4) which constitutes the armrest (2). The vertical position selector (29) is actuatable by virtue of means which can be activated by the user and comprise a slider (35) which can slide below the armrest (2) and is adapted to activate/deactivate the actuation of the vertical position selector (29).
