(54) Method for waterproofing junction of main and branch wires and cover therefor.

(57) A method for waterproofing a junction of branch wires with the main by enclosing the junction in a plastic cover containing a putty sealant and filling the inside of the cover with the sealant and a cover therefor are disclosed, the method comprising providing projections (n and m) on the inner side of cover (1) by which parallel wires (b) enfolded in the cover are vertically shifted or the parallel wires are not only vertically shifted but laterally spread by the projections to make enough space between adjacent wires (b) for letting the putty sealant in.

FIG. 2(b)

The present search report has been drawn up for all claims

Place of search	Date of completion of the search	Examiner
THE HAGUE	18 March 1994	Lommel, A

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
