Abstract (en)
[origin: WO7900558A1] Each compartment (3, 4) is delimited by five side walls securely fastened to each other (4, 5, 6, 7, 8; 10, 11, 12, 13, 14). Each pair of parallel side walls (5, 6; 13, 14) is elongated and form a guiding element for the relative displacement of the compartments, and also close the openings of the two compartments. Each compartment may be subdivided into further compartments by walls (15, 16). This cupboard is used for storing current use articles and preferably for setting objects vertically in one compartment and horizontally in the other.
