Abstract (en)
[origin: US4275878A] Disclosed is a device for separating sheets from a stack of sheets, comprising a base for supporting the stack of sheets; a bar extending transversely along one edge of the stack of sheets; two members attached to the bar at a distance from one another corresponding to the width of the sheets for holding down the corners of the sheets; and two guide elements mounted on the base on opposing sides of the stack of sheets for vertically displaceably receiving the bar and guiding the bar along a vertical path.
