Abstract (en)
[origin: EP0010461A1] 1. Noise-suppressed coaxial, cable, of the known type comprising between the core (1) and the external sheath (3) an insulation of high-density ceramic beads (2) threaded on the cable core, characterized in that all contact surfaces between the beads and the core, between the beads and the external sheath, and between adjacent beads, are provided with a conductive metallic lining, said lining being in particular continuous on the cable core.
