Abstract (en)
1. A wall or ceiling panelling, including a plurality of panelling boards (1) which, in parallel and spaced arrangement, are each mounted to two neighbouring support rails (2) having a U-section with straight free legs (7, 8) and a straight web (9) connecting said legs, said support rails being provided at certain intervals along the extent of their lengths with pairs of board attachment fittings, the board attachment fittings (3) of said pairs being each disposed to be transverse to the longitudinal direction of the support rail (2) and adjacent to each other, each panelling board (1) being provided on the reverse side thereof with board attachment fittings (4, 18) engaging with the board attachment fittings (3) provided at the support rails (2) and being arranged in rows parallel to two confronting edges of the panelling boards (1) near to said edges, characterized in that engaging means, having the form of a long slot (20) with fixing means passing therethrough, for a spacer (6) for setting the distance of each support rail (2) from a wall are provided at the two legs (7, 8) of the U-shaped support rail (2), and that the board attachment fittings are formed as hooks (3) punched out of the material of the support rail (2) or the panelling board (1), the hook portions (10) of said hooks, which have their free ends (11) bent outwards at an angle, being bent back resiliently towards the support rail surface or a surface portion of the panelling board (1) and, because of their spring action, clampingly engaging in corresponding openings (4) or eyelets (18) of the panelling boards (1) or support rails.

Abstract (de)
Wand- oder Deckenverkleidung bestehend aus mehreren Verkleidungstafeln (1), die parallel zueinander und in Abständen voneinander an Tragschienen (2) befestigt sind, wobei auf jeder Tragschiene (2) in Längserstreckung der Schiene in bestimmten Abständen voneinander Tafelbefestigungsmittelpaare, deren beide Tafelbefestigungsmittel (3) jeweils quer zur Längserstreckung der Tragschiene (2) nebeneinanderliegend angeordnet sind und jede Verkleidungstafel ihrerseits mit Tafelbefestigungsmitteln (4, 5) versehen ist, die in die Tafelbefestigungsmittel (3) eingreifen und in Reihen angeordnet sind, die parallel zu zwei entgegengesetzt liegenden Kanten der Verkleidungstafel (1) in der Nähe dieser Kanten angeordnet sind und dass jede Verkleidungstafel (1) an den Wandbefestigungsmitteln zweier benachbarter Tragschienen befestigt ist.
