Abstract (en)

A pressure sensitive label strip (1) comprising a tape-like strip of label material (2) that is overlaid on a tape-like strip of backing material (4); parting cut lines (6) extend transversely across the strip of label material at regular intervals so as to form a plurality of unit label pieces (L); feeding cut lines (7) are defined in the effective portions of each unit label piece except the marginal portion of the label piece to form feeding tongues, and other feeding cut lines (8) are defined in the backing material at the positions corresponding to the above former feeding cut lines to form feeding tongues which are of different shape from that of the former feeding tongues. Further, the above cut lines are effective for preventing the occurrence of unprinted portion and unfair switching of labels.
