Abstract (en)
[origin: EP0011257A1] A paneling system for covering walls, ceilings and floors particularly useful, but not limited to, highly abrasive environments such as in blast cabinets wherein workpieces are subjected to a high velocity stream of abrasive particles for cleaning or peening the workpieces. The system is comprised of two different configurations of plates (A.B.;C,D.) each reversible, preferably made of wear-resistant material, the plates being particularly conformed to provide for simple and easy replacement of worn plates.
