Abstract (en)  
[origin: EP0011657A1] 1. An incinerator for domestic garbage and the like, having a heat exchanger (40) which is disposed behind the combustion chamber and through which flow combustion gases, characterized in that said heat exchanger (40) includes can-shaped molded bodies (51) within the flow path, the open sides of which are facing downwards and the bottoms of which are facing upwards, that the bottoms of said molded bodies (51) are provided with one or more holes (52) and that gaps are disposed between the can-shaped molded bodies (51) through which the flue gases can pass said molded bodies (51), the velocity of said flue gases flowing through said molded bodies (51) being smaller than the velocity of the gases flowing past said molded bodies.
