Abstract (en)
[origin: EP0011696A1] 1. A device for supplying a continuously rotating casting table (12), onto which moulds (11) are mounted, preferably for light metal, characterized by at least one tiltable casting vessel (1 or 2 respectively), a casting gutter (6) downstream of the latter, swivel mounted in horizontal (15) and vertical (7) directions and horizontally slidable, and by means for the temporary connection of the casting gutter close to its spout with the continuously rotating casting table (12) supporting the moulds (11).
