Abstract (en)

[origin: EP0011781A1] 1. Method for producing insulated plaster facades by applying glass fibre fabric (3) and plaster to the grooved surface of rigid polystyrene foam slabs (1), wherein the latter have a defined after-shrinkage of at least 1 mm/m, characterized in that strip-foamed rigid polystyrene slabs with a compacted surface are used and that first of all the glass fibre fabric (3) is applied with the aid of a fixing agent (2) distributed above the slab (1) to the said slab at a distance of preferably 1 to 2 mm from the slab surface, following which a plaster containing 0 to 1% of plastics material is applied to the thus pretreated slab.
