Abstract (en)

1. Palletised packing which can be containerised for simultaneously preserving and transporting, in a controlled atmosphere, agricultural or horticultural products, in particular contained in initial packings (1) such as crates, comprising a first part (2), which is totally impervious to gases and vapours, and a second part (3) in the form of a device controlling the flows of gases and vapours from the interior to the exterior of the packing and from the exterior to the interior respectively, the first part comprising a base element (5), a side element (6) and a top element (7), the base element (5) being rigid, forming a pallet or being integral with a pallet forming part of the packing, the side element (6), in particular a film, being at least partially flexible, homogeneous, separate from the base element and connected at right angles to the latter in a rigid and sealing-tight manner, the top element (7) forming a part, which may or may not be separate from the side element, but which is connected thereto in a rigid and sealing-tight manner, characterised by the fact that the second part (3) consists of a diaphragm which is integral with the base element (5) comprising flat and rigid support means (35), an underframe (36), means (37) for supporting and protecting the diaphragm (3), and means (38) for adjusting the surface of this diaphragm (3) available for use.

Abstract (fr)

L'invention concerne un emballage palettisé conteneurisable pour la conservation et le transport de produits agricoles ou horticoles comprenant une première partie comportant un élément de fond, un élément latéral et un élément de dessus. Cet emballage est caractérisé par le fait que l'élément de fond (5) est rigide et forme une palette ou est intégré à une palette faisant partie de l'emballage, l'élément latéral (6) en film thermorétractable ou étirable est au moins partiellement souple, homogène, distinct de l'élément de fond (5) et normalement relié à celui-ci de façon rigide et étanche. L'invention est applicable à l'industrie de l'emballage.
