Abstract (en)

[origin: EP0013689A2] 1. Polygonal container, particularly for transporting refuse and building rubble, consisting of parallel steel sheets, welded together and angled in accordance with the cross-section of the polygon, with hollow ribs (5-9) extending beyond the edges (d, e), wherein the hollow ribs (5-9) in the area beyond the container edges (d, e) are formed from the material of the steel sheets themselves, consisting of welded-in rib elbows (10) within the area of the container edges (d, e), these closing the gaps of the hollow ribs the edge area.
