Abstract (en)

[origin: EP0014191A1] 1. Means for preventing a tilting or withdrawing of drawers or the like, which are arranged in the same horizontal plane of furniture case elements, characterized in that in response to the withdrawal of a drawer a slider (2), which is angled at both end portions and has a rounded tip and consists of a plate, pin or the like is caused by correspondingly shaped recesses (3) in the side walls (1) of adjacent drawers to move laterally through the case side walls (4) into the corresponding recess (3) of the side wall (1) of an adjacent drawer to lock the latter.
