

Title (en)

A method of comminuting for combustion such wood or cellulose material as is precompressed, or board- or strip-like per se, and an apparatus for carrying out the method.

Title (de)

Verfahren zur Zerkleinerung von der Verbrennung dienendem vorkomprimiertem Holz oder Zellulosematerial bzw. brett- oder streifenartigen Materials an sich sowie Vorrichtung zur Durchführung dieses Verfahrens.

Title (fr)

Procédé de broyage du bois ou du matériau cellulosique précomprimé ou des planches ou des bandes en soi en vue de leur combustion et dispositif pour la mise en oeuvre dudit procédé.

Abstract (en)

A method and a machine for comminuting precompact or board-like cellulose material, especially for feeding a stoker plant, for example, while using a roll pair (4, 5) for receiving the material, where each roll (e.g. 4) is provided about its periphery with alternating projections (6) and depressions (7) corresponding to depressions (7) and projections (6) on the second roll (5) in each such pair, which is driven with the same peripheral velocity for both rolls (4, 5). Said projections (6) and depressions (7) along the periphery and axially can have pyramidal shape, for example, the distance between the rolls being adjustable such that the sum of the radius to the crest of a projection (6) on one roll (4) and the radius to the bottom of a depression (7) on the corresponding roll (5) and complementary to said projection (6) is less than the distance between the central axes (9, 10) of the rolls.
