Abstract (en)

[origin: ES8100928A1] A supporting and guiding stand for a bow-type continuous casting plant comprises exchangeable supporting segments in which the rollers of the oppositely arranged inner and outer guideways are mounted at a distance from one another. The segments are supported on a carrying frame, which advantageously is dividedly designed. On each segment at least one rim-side roller of the outer guideway is detachably fastened to the segment.
