Abstract (en)
[origin: EP0016704A2] 1. A building consisting of self-solid modules placed side by side (6, 7, 8, 9), each one constituting one or several rooms of which the internal coverings and arrangements have been placed and/or equipped in a factory, the modules being then carried and settled definitively on the spot of the building, the properly called walls (37) and the roofing (38, 39) of the building resting upon the said walls being conventionally raised all around the equipped modules (6, 7, 8, 9), characterized in that each module is entirely encased inside a completely tight bag (118), the walls and the roofing not contacting the said bags (118) and the said bags being then cut out at the places of the openings (10, 11, 14, 16, 19, 21, 25, 26) when building is finished.
