Abstract (en)  
In a method for isolating tank walls (1), on the tank walls to be isolated are arranged isolating panels (4) from plastic material which are finished on the outer side thereof with a metal sheet (6) and are provided with openings (7) which are pushed over pins (3) soldered to the tank wall, whereby on said pins are screwed elements (3 min , 3 sec ) which press said panels against the tank wall, and in the space between said panels is injected a hardenable isolating foam (13) after having laid an adhesive tape (15) on those edges lying next to one another of said panels, to form said space.
