Abstract (en)  
[origin: EP0017462A1] Wire articles and a method of and kit of parts for forming same, comprising lengths of wire (1) of predetermined size and connector members (2 to 9) connecting or adapted to connect the lengths of wire (1) together. The connector members (2 to 9) each have at least two socket portions each adapted to receive an end portion of a cut length of wire. The wire (1) has a diameter of not more than 6.0mm, preferably 1.6mm to 3.0mm and the socket portions of the connector members (2 to 9) are adapted to receive the end portions of the wire (1) with a clearance of from 0.5 to 0.254mm, preferably 0.10 to 0.178mm. The end portions of the wire (1) are preferably adhesively secured in the connector members (2 to 9).
