Abstract (en)  
We are dealing here with a building (5) having a lift system (31) for the parking of motor vehicles, whereby the building (5) consists substantially of a plurality of floors, each of which has parking spaces (6-9) for motor vehicles, and of at least one roadway for the delivery of said motor vehicles, and comprises in reciprocal cooperation and coordination: - at least one plurality of floors extending sideways with a plurality of parking spaces (6-7-8-9), - at least one lift group (31) able to shift sideways along at least part of said plurality of floors and said plurality of parking spaces (6-7 and 8-9), - at least one surface (27) for the temporary support of motor vehicles and able to run vertically in respect of said lift group (31), - at least one group of tracks (24-21) for the running of said lift group (31), the tracks being positioned parallel to the front of said plurality of floors, - whereby said lift group (31) and said temporary supporting surface (27) can be shifted as desired.
