Abstract (en)  
[origin: EP0017644A1] 1. A foam thrower for fire-extinguishing purposes, comprising a throwing tube (4), which has air passage openings (5) and coaxially succeeds a discharge nozzle (3) of a liquid supply housing (1), wherein the discharge nozzle (3) has associated with it a longitudinally adjustable cylindrical central pipe (6) for an internal supply of air, characterized in that the discharge nozzle (3) comprises in known manner a cylindrical end portion and the central pipe (6) comprises a control bulge (10), which is enlarged relative to the outlet cross-section of the central pipe (6) and has a cylindrical control portion, which is displaceable into the end portion of the discharge nozzle (3) for changing the flow rate of the liquid.
