Abstract (en)

[origin: EP0017693A2] Device intended to prevent the introduction into apparatuses functioning with coins or tokens of all other objects which harm the proper working of these apparatuses. It comprises an obturator device formed by 3 main pieces 7, 8 and 8' provided with blocking tongues, to which the element (coin or token) to be introduced is applied, 2 of the elements sliding opposite each other being returned by spring and controlling via their tapered part the displacement of the 3rd element. This device can be adapted and used on any coin-actuated apparatus. <IMAGE>
