Abstract (en)
[origin: EP0017957A1] 1. A working platform for scaffolds, in particular steel tube scaffolds, consisting of individual butt-joined planks, in which the planks (1, 2) are able to be supported by the cross-pipes (7) of the scaffold with the aid of hooks (6, 6', 6'') fixedly secured to the ends of the planks and to be locked on the cross-pipes (7) by means of a locking arrangement, characterized in that projections (8 or 8') are fixedly secured to one end of each plank (1, 2) which projections after the mounting of the planks (1, 2) engage the outer ends of the hooks (6' or 6'') arranged on the respective neighbouring plank (1 or 2) from below, said hooks engaging in turn with one of their ends the cross-pipe (7) between two planks (1, 2) from below.
