Abstract (en)

[origin: EP0018006A2] 1. Insulation for the roof or wall of a building in which a supporting frame acting as support for an outer cladding is covered by an insulation which is held by connecting means on supporting elements (1) of the supporting frame, characterized in that the insulation comprises a foil (2) which is shaped in the area between the supporting elements (1) by hold down means (5, 10, 13, 16, 19, 20) to a form with cassette-like recesses (4) between the supporting elements (1), as well as insulating blocks inserted into said recesses.
