Abstract (en)
[origin: EP0018930A1] 1. Retractable pourer assembly to be associated to a receptacle (1) of the type comprising : - an annular base (2) shaped to be clipped in the opening (1b) of the receptacle ; - a tubular pourer (3) slidably extending through said base, said pourer comprising means (23) to limit its movement outwards and having on its lower portion an annular flange (11) cooperating with the base (2) in extended position of said pourer ; - a stopper (4) screwed on the thread (9) of the free end of the pourer (3) and having a second skirt (14) whose inner face is provided with an annular ring (14a, 14b) clipping beneath a bead (8) of the base, the periphery of the second skirt (14) of the stopper (4) being associated to two half-rings (15, 16) whose ends or feet (15a, 15b, 16a, 16b) rest upon an annular collar (6) of the base (2) when said half-rings are pivoted about the lugs (17, 18, 19, 20) constituting pivot means.
