Abstract (en)
[origin: EP0019230A1] 1. A panel saw comprising an upright frame (1) with a support grid (14) for a panel, having a) a guide beam (5) mounted on the frame (1) for horizontal displacement, b) a locking device (16) arranged between the frame (1) and the guide beam (5), c) a tool carriage (6) mounted on the guide beam (5) for vertical displacement, d) a circular saw (8) mounted on the tool carriage (6) for displacement into an operative position, in a direction vertical to the support grid (14), characterized by e) a stop member (31) which is arranged for being actuated jointly with the locking device (16) and which, in the inoperative position of the circular saw (8), protrudes into the path of displacement of the circular saw (8) vertical to the support grid (14) (Fig. 3).
