Abstract (en)

1. Impact crusher with hinged hammers, including a stack of angularly shifted plates (2) mounted on the crusher shaft (7), the said plates supporting the hinge pins (3) of the hammers, characterized by the fact that the successive plates (2) of the stack are welded to each other, two adjacent plates being welded along the sections of the outline of one of the plates which delimit its contact surface area with the other plate, in such a way that the stack constitutes a one-piece assembly.

Abstract (fr)

Un concasseur à percussion à marteaux articulés (5) comprend un empilage de plateaux (2) angulairement décalés qui est monté sur l'arbre (7) dudit concasseur, les dits plateaux supportant les axes d'articulation (3) des marteaux (5). En vue de réaliser l'empilage sous la forme d'un ensemble monobloc, les plateaux successifs (2) dudit empilage sont soudés entre eux, deux plateaux (2) adjacents étant soudés suivant la partie du contour de l'un des plateaux délimitant sa zone de contact avec l'autre plateau.
