Abstract (en)
[origin: WO8001290A1] Supply process of disintegrators with sheets paste delivered in bales. The rectangular sheets are deposited one after the other on a supply belt with their longitudinal axis set off by 45° with respect to the feed direction of the belt, and then two lateral equal portions of each sheet are folded down by bending according to two bending lines parallel to the feed direction of the belt, the distance between said lines being equal to $L/2$ and two adjacent sheets being separate from each other by a distance equal to $x = L/2$ and L being respectively the length and the width of the paste sheet. Supply of a machine for manufacturing babies napkins.
