Abstract (en)

A badge card obliterating machine and a badge card therefor are described, the obliterating machine comprising a detector (20) located at a detent surface (13) whereon the card (1) is caused to rest, a reading head (30) for reading the card (1) and actuated by a first motor (38), and an obliterating sleeve/punch assembly (40, 50) effective to destroy the first mark in a mark set corresponding to the service utilized and actuated by a second motor (64) controlled by the reading head (30). The badge card comprises a plate-like element (1) of rectangular configuration with three rounded corners and a sharper fourth corner (2) effective to act as a locating element for the card and to cooperate with the detector (20).
