Abstract (en)
[origin: EP0021224A1] 1. Hair treating device (11) with a catalytic heating system (30) in the hair curling zone, having a fuel container (20) for receiving a preferably liquid fuel, a device (41, 75, 93, 94) for vaporizing the fuel, a device (29) for mixing the fuel with fresh air and a catalyst (30) arranged in the combustion chamber, characterized by a valve mechanism (38, 77, 89 ; 42, 81, 95/96 ; 73, 86) with an actuator (36, 80, 90 ; 37 ; 48 ; 49) for regulating the fuel-air mixture flowing on the catalyst (30) as a function of the temperature prevailing in the combustion chamber, as well as an ignition device (52 - 72) with an operating member (13) for initiating the combustion process, integrated in the hair treating device in a fixed manner.
